Investigators at University of California Have Published New Data on Developmental Biology

Published in [Life Science Weekly](#), October 9th, 2012

2012 OCT 9 (NewsRx) -- By a News Reporter-Staff News Editor at Life Science Weekly -- Investigators publish new report on Developmental Biology. According to news reporting originating in Los Angeles, California, by NewsRx journalists, research stated, "The innate plasticity of hematopoietic progenitors is tightly regulated to supply blood cells during normal [hematopoiesis](#) and in response to stress or infection. We demonstrate that in the *Drosophila* [lymph gland](#) (LG) the [tumor](#) suppressors TSC and PTEN control blood progenitor proliferation through a common TOR-and 4EBP-dependent pathway."

The news reporters obtained a quote from the research from the...
